Add Scopes

Scopes define the API methods this app is allowed to call, and thus which information and capabilities are available on Zoom. Scopes are restricted to specific resources like channels or files. If your app is submitted to Zoom, we will verify the need for all requested scopes against the features that your app has to offer at the time of review. Please remove unneeded scopes before you submit your app. [Learn more about Zoom's scopes](#)

Q Search name, ID, type
